Dr Rani Kumar MBBS, MS, FAMS is Retired Professor & Head of Anatomy and Dean at AIIMS New Delhi. She has a total of 40 years of Anatomy teaching experience at AIIMS at UG and PG levels. She was awarded Distinguished Teachers' Award by Delhi medical Association in 1992 and Best Research Paper on Experimental Embryology by Anatomical Society of India. She was also awarded Fogarty International Fellowship at National Institute of Health; Bethesda, Maryland, USA in 1980 for one year .She has published many scientific papers in international and national journals of repute.

This updated volume provides detailed summaries of relevant science topics for anaesthetists approaching the Final FRCA examination.

This manual is a practical guide to anatomy for undergraduate medical students. Divided into four sections, the book begins with an introduction to incisions, explaining dissection anatomy of upper and lower limbs, the abdomen, and head and neck. The second section provides in depth discussion on surface anatomy, and section three describes the histology of all systems in the body, outlining standard staining procedures and microscopy illustrated by relevant slides. The final section covers the radiological anatomy of each section of the body, enhanced by X-Ray images. Each section is presented in a systematic approach and includes questions and answers that candidates may encounter in examinations. Key points Comprehensive guide to practical anatomy for undergraduate medical students Covers window dissections, surface anatomy, histology and radiological anatomy Topics enhanced by clinical photographs, radiological images and histological slides Each chapter features questions and answers that may be encountered in exams

Aims to offer revision preparation for candidates about to sit the FRCS examination. This text is intended to cover both the requirements of the Section A Practical Anatomy viva and also the anatomy section of the intercollegiate examination in orthopaedics.

This book contains all the Important questions asked in the university and class test of Human anatomy exams. It has theory and clinical/practical questions separately.
