Low platelet count (thrombocytopenia):
Causes, treatment ...

Clinical and Physiological Importance of Platelets. Platelets are a very important component of blood in both physiological and pathological condition which may include the following: Hemophilia: This is

a physiological condition characterized by prolonged clotting time. This means a little or slight injury or damage to cells, tissue, and organs will lead to profuse bleeding.

Platelets: Definition, Functions and Importance

Circulating blood platelets play a central

role in the maintenance of hemostasis. They adhere to subendothelial extracellular matrix proteins that become exposed upon vessel wall damage, which is followed by platelet activation, further platelet recruitment, platelet aggregation and formation of an occlusive, or non-occlusive, platelet thrombus.

The clinical significance of platelet microparticle ...

Platelets (thrombocytes) are colorless blood cells that help blood clot. Platelets stop bleeding by clumping and forming plugs in blood vessel injuries.

Thrombocytopenia might occur as a result

The platelet count may represent a

surrogate marker of the severity of organ dysfunction. A low platelet count occurring even early in sepsis patients is indeed recognized as a sign of poor prognostic; however, a single platelet count at admission may have little pertinence , and the kinetics of platelet counts appears to have a deeper meaning.

Read Free Blood Platelets Clinical Relevance

Two alterations of this kinetics have been shown to be of clinical interest in sepsis patients, suggesting that they must be given specific attention.

Battle is a practical and sometimes lasting way of solving man's problems. It relies on the strength of the combatants and ignores

the truth of the dispute. Discussion face to face can dissolve attitudes which have incorrectly determined judgements. The most striking example of this that I know is a Battle in Ireland in the eleventh century, where the king of Leinster fought a Viking prince. The Icelanders had raided Ireland for several generations in search of

women, which they lacked since most of the population of Iceland were men who had arrived there by rowing long-boats from Norway. The prince was leading such a raid for the first time. Standing in the prow of the leading boat he saw Irish cavalry galloping along the beach to meet them. As they approached the shore the

Irish king rode out of the band to challenge single combat. The Icелander jumped into the surf to meet him. As they raised their swords each realized that the other's face was like his own. When the Irish king spoke the other recognized the language. It had been spoken in Iceland by his grandmother who had been captured
