The diagnosis determines which type of treatment you need and what needs to be addressed. One of the most important things for the chiropractor to do is to identify the pain producing structure(s), in order to be able to direct the treatment accurately to reduce the pain and promote healing as quickly and effectively as possible.

Diagnosis and Chiropractic treatment

Diagnosis, Treatment and Management of Conditions. Chiropractic is a primary healthcare profession that specialises in the diagnosis, treatment and overall management of conditions that are due to problems with the joints, muscles and nerves, with particular focus on the spine. We assess body performance through FMS and SFMA testing, before we recommend the appropriate treatment plan.
