Will This Manually-Powered Elevator Replace Stairs One Day?
Typical elevator doors. An elevator(North American English)[1]or lift(Commonwealth English)[2]is a type of vertical cable transportationmachine that moves people or freight between floors, levels, or decks of a building, vessel, or other structure. Elevators are typically powered by electric motors that drive traction cables and counterweightsystems such as a hoist, although some pump hydraulic fluid to raise a cylindrical piston like a jack.

Elevator - Wikipedia
Manual elevators were often controlled by a large lever. The elevator operator had to regulate the elevator's speed, which typically required a good sense of timing to consistently stop the elevator parallel to the floor.
