While there is consensus
that institutions need to
represent their educational

documentation of student

educational effectiveness,
and those who believe that
valid assessment of student
achievement is based on
assessing the work that

students produce along and at the end of their educational journeys. This book espouses the latter philosophy—what Peggy Maki sees as an integrated and authentic approach to providing evidence of student learning based on the work that students produce along the chronology of their learning. She believes that assessment needs to be humanized, as opposed to standardized, to take into account the demographics of institutions, as students do not all start at the same place in their learning. Students also need the tools to assess their own

File Type PDF Essment Clear And Simple A

progress. In addition to updating and expanding the contents of her first edition to reflect changes in assessment practices and developments over the last seven years, such as the development of technology-enabled assessment methods and the national need for institutions to demonstrate that they are using results to improve student learning, Maki focuses on ways to deepen program and institution-level assessment within the context of collective inquiry about student learning. Recognizing that assessment is not initially a linear start-up process or even

File Type PDF Essment Clear And Simple A

necessarily sequential, and recognizing that institutions develop processes appropriate for their mission and culture, this book does not take a prescriptive or formulaic approach to building this commitment. What it does present is a framework, with examples of processes and strategies, to assist faculty, staff, administrators, and campus leaders to develop a sustainable and shared core institutional process that deepens inquiry into what and how students learn to identify and improve patterns of weakness that inhibit learning. This book

is designed to assist colleges and universities build a sustainable commitment to assessing student learning at both the institution and program levels. It provides the tools for collective inquiry among faculty, staff, administrators and students to develop evidence of students' abilities to integrate, apply and transfer learning, as well as to construct their own meaning. Each chapter also concludes with (1) an Additional Resources section that includes references to meta-sites with further resources, so users can pursue particular issues in

greater depth and detail and (2) worksheets, guides, and exercises designed to build collaborative ownership of assessment. The second edition now covers: *

- * Strategies to connect students to an institution's or a program's assessment commitment
- * Description of the components of a comprehensive institutional commitment that engages the institution, educators, and students--all as learners
- * Expanded coverage of direct and indirect assessment methods, including technology-enabled methods that engage students in the process
- * New case studies and campus examples covering
