The contents of this document correspond to the contents of the STEP 7 V13 online help with respect to contents and structure.

S7-1200 Motion Control V13 - Siemens

For S7-1200, the motion control version is V6.0 for TIA V15.. FYI - please see the attached picture. Using the analog output with motion control directly, there is no hijacking of this port...In OB "MC-PostServo" you could manipulate the data area of the output value, as it is written to a DB or directly to analog out.
