Noi filologi. Testo tedesco a fronte: "Io sogno una compagnia di uomini che siano liberi da condizioni, non conoscano l'indulgenza e vogliono chiamarsi 'annientatori': essi applicano ad ogni cosa il metro della loro critica e sacrificano sé stessi alla verità.Ciò che è cattivo e falso deve venire alla luce!

Fumare è una dipendenza psicotossica e la nicotina è una sostanza psicoattiva morbosa. Il testo indirizzato ad operatori e a consumatori, presenta i principali modelli terapeutici per il trattamento di coloro che sono affetti da tabagismo. Sono indicati percorsi per smettere di fumare e strumenti operativi per rimanere non fumatori.

Conoscere la dipendenza eccessiva e la trappola del giochi d'azzardo, aiuta a comprendere un fenomeno di alto costo sociale. Le illusioni, il desiderio di vincere, la difficoltà di controllare l'impulso di scommettere e non riuscire a smettere nonostante le cospicue perdite di denaro e le conseguenze familiari, riguarda la patologia distruttiva del giocatore compulsivo. Il testo fornisce strumenti di valutazioni e strategie d'intervento utili per contenere e trattare soggetti alla ricerca di sensazioni estreme e per la prevenzione di ricadute.

Europe's boundaries have mainly been shaped by cultural, religious, and political conceptions rather than by geography. This volume of bilingual essays from renowned European scholars outlines the transformation of Europe's boundaries from the fall of the ancient world to the age of decolonization, or the end of the explicit endeavor to "Europeanize" the world. From the decline of the Roman Empire to the polycentrism of today's world, the essays span such aspects as the confrontation of Christian Europe with Islam and the changing role of the Mediterranean from "mare nostrum" to a frontier between nations. Scandinavia, eastern Europe and the Atlantic are also analyzed as boundaries in the context of exploration, migratory movements, cultural exchanges, and war. The Boundaries of Europe, edited by Pietro Rossi, is the first installment in the ALLEA book series Discourses on Intellectual Europe, which seeks to explore the question of an intrinsic or quintessential European identity in light of the rising skepticism towards Europe as an integrated cultural and intellectual region.

This book, based on authoritative sources and reports, links environmental communication to different fields of competence: environment, sustainability, journalism, mass media, architecture, design, art, green and circular economy, public administration, big event management and legal language. The manual offers a new, scientifically based perspective, and adopts a theoretical-practical approach, providing readers with qualified best practices, case studies and 22 exclusive interviews with professionals. A fluent style of writing leads the readers through specific details, enriching their knowledge without being boring. As such it is an excellent preparatory and interdisciplinary academic tool intended for university students, scholars, professionals, and anyone who would like to know more on the matter.

This state-of-the-art book presents research-based practice guidelines that clinicians of any orientation can use to optimize the therapeutic alliance. Leading proponents of the major psychotherapeutic approaches explain just what a good alliance is, how to create it, and how to recognize and repair alliance ruptures. Applications in individual, group, couple, and family therapy are explored; case examples vividly illustrate the concepts and techniques. Links between the quality of the alliance and client outcomes are elucidated. A section on training fills a major gap in the field, reviewing proven strategies for helping therapists to develop key relationship-building skills.

Work is constantly reshaped by technological progress. New ways of production are adopted, markets expand, and societies evolve. But some changes provoke more attention than others, in part due to the vast uncertainty involved in making predictions about the future. The 2019 World Development Report will study how the nature of work is changing as a result of advances in technology today. Technological progress disrupts existing systems. A new social contract is needed to smooth the transition and guard against rising inequality. Significant investments in human capital throughout a person's lifecycle are vital to this effort. If workers are to stay competitive against machines they need to train or retool existing skills. A social protection system that includes a minimum basic level of protection for workers and citizens can complement new forms of employment. Improved private sector policies to encourage startup activity and competition can help countries compete in the digital age. Governments also need to ensure that firms pay their fair share of taxes, in part to fund this new social contract. The 2019 World Development Report presents an analysis of these issues based upon the available evidence.

That's right, you already know Italian--even if you never took a language course in your life! Many of the words you know in English are similar and often the same in Italian, such as arte and delizioso. And pizza, bambino, and diva have been part of our lexicon for so long you forget they were ever "foreign." You Already Know Italian is the easiest and fastest way to build your Italian vocabulary by using your prior knowledge as the foundation for language learning. Inside you will find chapters devoted to three types of words: familiar terms, identical and similar terms, and "falsely similar" terms. By studying these words, you will realize just how many Italian words you already know and how easy it is to pick up those terms that are close in meaning to their English counterparts. You will have a 5,000-word Italian vocabulary in no time at all! Look how much Italian vocabulary you already know: Familiar Italian terms: Amore--Love Bandito--Outlaw Ciao--Hello Pasta--Pasta Simpatico--Agreeable Vino--Wine Italian words identical or similar to English ones: Computer--Computer Jazz--Jazz Leader--Leader Quota--Quota Uso--Use Virus--Virus But beware these falsely similar words: Ago--Needle Camera--Room Fatto--Fact Salto--Jump Stare--To stand Villano--Inconsiderate

In English for the first time, a guide to the true secret structure of the Illuminati and their invisible network made of various power structures, author Leo Lyon Zagami uses their internal documents and reveals confidential and top-secret events. His book contends that the presence of numerous Illuminati brotherhoods and secret societies—just as those inside the most prestigious U.S. universities such as Yale or Harvard—have always been guides to the occult. From the Ordo Templi Orientis (OTO)'s infiltration of Freemasonry to the real Priory of Sion, this book exposes not only the hidden structure of the New World Order and the occult practices but also their connections to the intelligence community and the infamous Ur-Lodges.
