## **Programming with STEP 7 – Siemens**

STEP 7 (TIA Portal) is already characterized by a comprehensive range of integrated functions. But for tasks beyond standard automation requirements, these functions can be expanded by using tailored options that can be seamlessly integrated into STEP 7 and TIA Portal, such as failsafe applications or technological tasks.

## **PLC programming with SIMATIC STEP 7 (TIA Portal ...**

The components for programming (STEP 7) and visualization (WinCC) are not separate programs, but rather editors of a system that accesses a common data base. All data are stored in a common project file. You use a common user interface for all tasks to access all programming and visualization functions at all times. 7,\$3RUWDO
