In 1863 black communities owned less than 1 percent of total U.S. wealth. Today that number has barely budged. Mehrsa Baradaran pursues this wealth gap by focusing on black banks. She challenges the myth that black banking is the solution to the racial wealth gap and argues that black communities can never accumulate wealth in a segregated economy.

On February 25, 1946, African Americans in Columbia, Tennessee,

averted the lynching of James Stephenson, a nineteen-year-old, black Navy veteran accused of attacking a white radio repairman at a local department store. That night, after Stephenson was safely out of town, four of Columbia's police officers were shot and wounded when they tried to enter the town's black business district. The next morning, the Tennessee Highway Patrol invaded the district, wrecking establishments and beating men as they arrested them. By day's end, more than one hundred African Americans had been jailed. Two days later, highway patrolmen killed two of the arrestees while they were awaiting release from jail. Drawing on oral interviews and a rich array of written sources, Gail Williams O'Brien tells the dramatic story of the Columbia "race riot," the national attention it drew, and its surprising legal aftermath. In the process, she illuminates the effects of World War II on race

relations and the criminal justice system in the United States. O'Brien argues that the Columbia events are emblematic of a nationwide shift during the 1940s from mob violence against African Americans to increased confrontations between blacks and the police and courts. As such, they reveal the history behind such contemporary conflicts as the Rodney King and O. J. Simpson cases.

Education, Pettit shares its relevance to his education and to his career as a civil-rights lawyer. His memoir details a host of milestones, including an early childhood in the black community and a sudden transition into a tense, all-white world at Aberdeen High School where he was admitted by order of the U.S. District Court. He recalls his time at Howard University as well as the major litigation and representation in which he was involved as a lawyer, focusing in particular on his father's case which involved the treatment, torment and retaliation his father experienced at his job for bringing his son's desegregation lawsuit to trial. Attorney Pettit's memoir also traces his involvement in politics, especially his intimate role in the Jimmy Carter 1976 presidential campaign and the Carter administration. Providing insight into past and current civil-rights issues, *Under Color of Law* underscores the Pettit

codes that have legislated sexual behavior from America's earliest days to today's fractious political climate. This "fascinating and maddening" (Pittsburgh Post-Gazette) narrative shows how agitators, moralists, and, especially, the justices of the Supreme Court have navigated issues as divisive as abortion, homosexuality, pornography, and contraception. Overturning a raft of contemporary shibboleths, Stone reveals that at the time the Constitution was adopted there were no laws against obscenity or abortion before the midpoint of pregnancy. A pageant of historical characters, including Voltaire, Thomas Jefferson, Anthony Comstock, Margaret Sanger, and Justice Anthony Kennedy, enliven this "commanding synthesis of scholarship" (Publishers Weekly) that dramatically reveals how our laws about sex, religion, and morality reflect the cultural schisms that have cleaved our nation from its founding.

One of our most prescient political observers provides a sobering account of how pitched battles over scarce resources will increasingly define American politics in the coming years—and how we might avoid, or at least mitigate, the damage from these ideological and economic battles. In a matter of just three years, a bitter struggle over limited resources has enveloped political discourse at every level in the United States. Fights between haves and have-nots over health care, unemployment benefits, funding for mortgage write-downs, economic stimulus legislation—and, at the local level, over cuts in police protection, garbage collection, and in the number of teachers—have dominated the debate. Elected officials are being forced to make zero-sum choices—or worse, choices with no winners. Resource competition between Democrats and

Republicans has left each side determined to protect what it has at the expense of the other. The major issues of the next few years—long-term deficit reduction; entitlement reform, notably of Social Security, Medicare, and Medicaid; major cuts in defense spending; and difficulty in financing a continuation of American international involvement—suggest that your-gain-is-my-loss politics will inevitably intensify.
