When her husband was diagnosed with a serious brain tumor, Marianne Tauber turned to art-painting and poetry-to cope with the situation. Years later, she explicates what was behind the drive to create, presenting seventeen paintings and poems alongside a narrative of the time of crisis in journal form and then delving into the concepts of Jungian psychology and alchemy to make sense of the images and their healing effect. "This is a gripping and powerful book, catalyzed by crisis and personal tragedy, but born of an imaginative and courageous spirit. Through her meditative discipline, painting, and poetry, Tauber looks unflinchingly into the darkest depths of her soul. Creatively developing an alchemical active imagination, she follows an arduous path, not only to psychological survival, but to redemption, greater wholeness, and wisdom. Replete with archetypal and symbolic amplifications, *The Soul's Ministrations* is a significant and scholarly contribution to Jungian literature and a valuable guide to anyone who must struggle with the tragic aspects of life or wishes to learn about the creative depths of the psyche." -Stanton Marlan, Ph.D., ABPP

From whence spring the sparks of creativity? It is to this very question that the field of depth psychology—especially that of C.G. Jung and his intellectual descendants—has much to contribute. Just as the Muses were the offspring of Mnemosyne, the goddess of memory, our memories are the ancestors of our creativity that finds its multifaceted expression in the written word, image, theater, dance, and music. *The Unconscious Roots of Creativity* seeks to push the investigation into that domain of memory that is beyond our conscious reach. With articles from 16 contributors, the “red thread” running through each of the offerings in this volume is that, whatever its ultimate expression, the creative impulse has its roots deep in the psyche. Edited By Kathryn Madden with articles by Linda Carter, Anna Maria Costantino, Carol Thayer Cox, Leonard Cruz, Lisa Raye Garlock, James Hollis, Naomi Ruth Lowinsky, Ian Livingston, Kathryn Madden, Jordan S. Potash, Susan Rowland, Murray Stein, Ann Ulanov, Tjeu van den Berk, Robin van Loben Sels, and Heidi S. Volf.

AGING – You can run from it, but you can't hide, so the inevitable question is HOW ARE YOU GOING TO MEET IT? With avoidance, rigidity, or resignation on a mournful protest through your remaining years? Or will you enhance the quality of your remaining lifetime by meeting aging with acceptance, curiosity, resilience, gratitude, and even awe? Weaving together the benefits of mindfulness meditation and Jungian psychology, *Moonlight Serenade: Embracing Aging Mindfully* extends an invitation to meet your aging years consciously and courageously by being aware of the inevitable passing of time; by learning to experience each moment fully; and by creating a healthy relationship with all that time presents, including the 10,000 joys and 10,000 sorrows of life. Major life provocations, including chronic pain, grief, and life-limiting illness, are challenging at any age but especially during the later years, so they are examined in-depth. Rather than a futile attempt to transcend your human experience, *Moonlight Serenade* provides skills and attitudes to meet your aging years boldly, confidently and wholeheartedly. Through an unflinchingly honest and compassionate tone, Dr. Wallace guides you through a detailed nine-week program of instruction to help aging readers like yourself develop and cultivate a personal practice of mindful awareness of each moment. To assist in learning mindfulness practices, audio meditation instructions are available at the book's website, www.embracingagingmindfully.com. However, this is more than a how-to book as he also resurrects aging from its cultural pessimism by extending the opportunity to courageously explore and experience an attitudinal transformation of your relationship to life. There is a better way to live the remaining years of your life—no matter how long that may be. While aging inevitably involves losses, it also offers the opportunity for personal growth and development to become all you can be. Mindfulness meditation and Jungian practices are offered as self-sung serenades, encouraging you to lovingly court and support yourself throughout your aging moonlit years.

The Call of the Daimon: Love and Truth in the Writings of Franz Kafka includes Kafka's life, characters and events in the novels, contemporary poetry, and Aldo Carotenuto's interpretations of critical Jungian perspectives.

Suppose you could take action in your dream to eliminate a recurring nightmare, heal a relationship, or even a physical ailment. The 100 dreamers in this book have! They are presented by 22 internationally acclaimed experts, psychologists, researchers, and best-selling authors from the International Association for the Study of Dreams (IASD)

Our greatest certainty and greatest mystery is our mortality. In this book, Steven M. Rosen explores the profound mystery of death and rebirth from psychological, philosophical, and alchemical perspectives. To model, embody, and contain the paradoxical transformations involved in the death-rebirth enigma, Rosen employs a paradoxical form of mathematics: the topology of the Moebius strip and Klein bottle. As we follow this alchemical odyssey, the author makes himself transparent through his dreams and brings himself tangibly into his text so as to enact a dialectic of ego and Self. "In tackling the subject of death and rebirth Steven Rosen writes about our modern state of mind, how we got like this and where we need to go from here. He does all this with a psychotherapeutic insight that begins with his own subjectivity-and his own dreams-and ends with the subjectivity of the modern world. Using myths, dreams, and alchemical symbolism as well as psychological research and Jungian insights, Rosen speaks to us all from the self and the Self. A book to be read immediately, and then read again." -Christopher Hauke, Jungian analyst and author of *Jung and the Postmodern: The Interpretation of Realities* "How does a mental-spiritual ego, the creation of our post-Renaissance world, embrace the body as a living partner? In *Dreams, Death, Rebirth*, Steven M. Rosen offers a topological analysis that meets the challenge of this daunting endeavor. It is a remarkable accomplishment, and vital for the advancement of psychotherapy." -Nathan Schwartz-Salant, Jungian analyst and author of *The Black Nightgown: The Fusional Complex and the Unlived Life* Steven M. Rosen is professor emeritus of psychology at the College of Staten Island of the City University of New York. After receiving his PhD in psychology in 1971, he began exploring the foundations, frontiers, and poetics of science, and his work became transdisciplinary and philosophical in nature. His essays have appeared in journals and collections spanning the fields of psychology, philosophy, theoretical physics, education, semiotics, and ecology. He is the author of *Science, Paradox, and the Moebius Principle* (1994), *Dimensions of Apeiron* (2004), *Topologies of the Flesh* (2006), and *The Self-Evolving Cosmos* (2008).

Discusses diseases and ailments that have been connected to sex throughout history, and the reactions to them that have been

shaped by religion or morality.

Most mental health professionals and behavioral scientists enter the field with a strong desire to help others, but clinical practice and research endeavors often involve decision-making in the context of ethical ambiguity. Good intentions are important, but unfortunately, they do not always protect the practitioner and client from breaches in ethical conduct. Academics, researchers, and students also face a range of ethical challenges from the classroom to the laboratory. Now in a new expanded edition, *Ethics in Psychology and the Mental Health Professions*, the most widely read and cited ethics textbook in psychology, has emerged with a broadened scope extending across the mental health and behavioral science fields. The revised volume considers many of the ethical questions and dilemmas that mental health professionals encounter in their everyday practice, research, and teaching. The book has been completely updated and is now also relevant for counselors, marriage and family therapists, social workers, and psychiatrists, and includes the ethics codes of those groups as appendices. Providing both a critical assessment and elucidation of key topics in the APA's guidelines, this comprehensive volume takes a practical approach to ethics and offers constructive means for both preventing problems, recognizing, approaching, and resolving ethical predicaments. Written in a highly readable and accessible style, this new edition retains the key features which have contributed to its popularity, including hundreds of case studies that provide illustrative guidance on a wide variety of topics, including fee setting, advertising for clients, research ethics, sexual attraction, how to confront observed unethical conduct in others, and confidentiality, among others. *Ethics in Psychology and the Mental Health Professions* will be important reading for practitioners and students-in training. An instructors manual is available for professors on <http://www.oup.com/us/companion.websites/9780195149111>

A History of Modern Psychology, 3rd Edition discusses the development and decline of schools of thought in modern psychology. The book presents the continuing refinement of the tools, techniques, and methods of psychology in order to achieve increased precision and objectivity. Chapters focus on relevant topics such as the role of history in understanding the diversity and divisiveness of contemporary psychology; the impact of physics on the cognitive revolution and humanistic psychology; the influence of mechanism on Descartes's thinking; and the evolution of the third force, humanistic psychology. Undergraduate students of psychology and related fields will find the book invaluable in their pursuit of knowledge.
